

Activity Notice

Suburban Rd pump station upgrades

Water Corporation and our contractors Valmec are working to upgrade the wastewater pump station on **Suburban Road in Northam** (corner of Suburban Rd and Mudalla Rd). The work will expand the emergency storage of the pump station and increase its ability to keep up with flows during significant wet weather events.

Tankering works timing update

We previously indicated that the pump station would go offline in late July. Due to contractor availability, this is now scheduled to commence in **early May**.

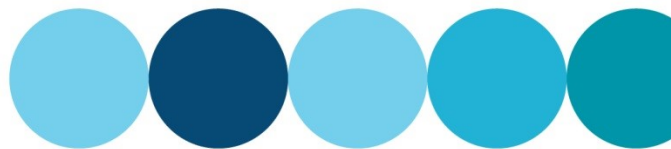

Wastewater tankering will be required from **Monday 2 May for up to 4 days**. During this time you may notice increased activity and noise associated with the works and tankering, including outside of normal works hours. The tankering route is shown on the map below. Wastewater will be transported to the treatment plant by tanker trucks during the day time. Tankering during the evening and overnight will be avoided as much as possible.

These works are dependent upon the weather forecast. Works may be delayed up to a week in the event of rainfall.

We appreciate that this work may be impactful. We thank you for your patience and understanding of the schedule change whilst we undertake this important work.

There will be no interruptions to your water supply or wastewater services. Minor traffic management may be required at times to allow vehicles, pedestrians and cyclists to proceed safely around the work area.

What is happening next?

Installation of additional emergency storage tanks and associated infrastructure will commence later in May 2022. The project is scheduled to **finish during August 2022**.

All work will be confined to the wastewater pump station site.

Who can I contact?

For further information please contact Gemma Bertrand from Community Engagement on (08) 9420 2895 or Community.Engagement@watercorporation.com.au or visit www.watercorporation.com.au/NorthamWastewater
