

# WATER AWARE CHECKLIST

Use this checklist to assess your current water use and identify opportunities to save water and money.

## Water Sources

- I know where my water comes from (scheme, rainwater, groundwater, or a combination)

## Water Use

- I know my Water Corporation account number (if applicable)
- I know my water meter number
- I have downloaded my historical water use data
- I have reviewed my water use patterns

## Waterwise Status

- I know my Waterwise status rating

## Leak Check

- I have checked my water meter for leaks
- I have checked for green patches in summer
- My taps do not leak
- My toilet does not leak

## Water Using Hardware

- I have listed all water-using fixtures and appliances in my home

**Showers**

- I know my shower flow rate (L/min)
- I know how long my showers last
- I can shower for 4 minutes or less
- I have explored waterwise showerhead options

**Baths**

- I know approximately how much water I use per bath
- I can reduce bath water use if needed

**Taps**

- My taps have aerators or flow controllers
- I know my tap flow rates
- I turn taps off when not actively using water

**Toilets**

- I know how much water my toilet uses per flush
- I use the correct flush option

**Appliances**

- I know the water usage of my washing machine and dishwasher
- I use the most water-efficient cycles

**Air Conditioning**

- I know what type of air conditioning I use
- My system is well-maintained and leak-free

**Irrigation**

- I know what irrigation system I have and how much water it uses

**Pools & Spas**

- My pool or spa has a cover

**Hot Water System**

- I have checked my pressure release valve
